

Social climate trees

Land - which?

- Clear ownership; public, or otherwise
- Certain size - at least 100 trees in one spot
- Bare land before planting

Which kinds of trees

- Something locals can use
 - But not commercial crop.. (e.g. coffee or rubber)
- Local species - also mixtures
 - From local nurseries or seedling collection under older trees
- Planting and initial tending paid for, to community members

Customers

- Companies - for their reputation and staff
- Individuals, in Europe and Africa
- LOCAL buyers, in Uganda?
- NGOs, for travel offsetting

Buyers want verification

Benefits

- IF the Carbon gets sold
 - In cash - 2 USD per 3 trees - over 20 years
 - Paid ONLY for growth of trees
 - Paid annually, according to tree survival and growth
 - To community - can use the trees and get the 'carbon money'
 - NOT to officials
 - Consider it savings, or investment money for the locals
